savings in your electricity
consumption*

PV system solutions by Petrolina Solar.
With the reliability of the Petrolina Group.

*The obligation to pay the fixed fee on electricity bills remains.

Solar energy: Inexhaustible, reliable, affordable.

Solar energy is one of the most important renewable energy sources. In Cyprus, we enjoy sunshine around 326 days per year, which we can use to meet our energy needs.

Why invest in PV systems?

Advantages:

- Reduction of electricity bill
- Minimum maintenance
- Zero pollutants emissions
- Long life span (over 20 years)
- Quick & easy installation at new or existing premises
- Reliable operation
- Approximately 5 years payback period

Why choose us?

We offer integrated PV systems solutions, for residential or industrial use, depending on your energy needs.

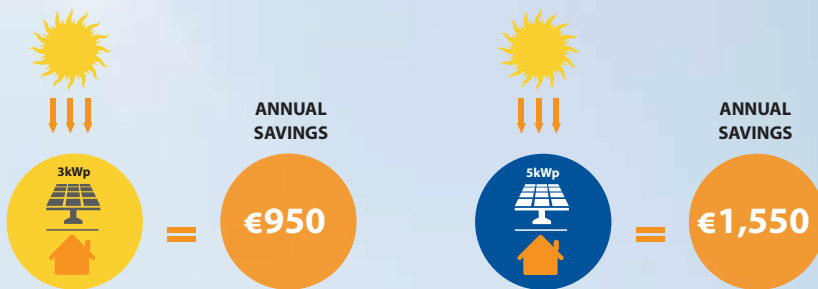

Services

- Site visit, free techno-economic study, design and consulting services
- Application submission for licensing/approval of PV system
- PV system installation
- Technical support after the completion of the system

The High Quality Choice

- International standards implementation on every PV system package
- Specialized and well-trained installers-technicians, certified by internationally recognized educational centres
- Selection of reliable partners and suppliers
- Selection of latest technology products and materials

Indicative annual energy savings*:

*The obligation to pay the fixed fee on electricity bills remains.
